## OFF CAMPUS ISSUES

July 12th, 2000

The Implementation plan was given out to all in attendance and we went around the table to discuss what had been accomplished and got suggestions on how to better achieve our goals.

### CONA and NEIGHBORHOOD ASSOCIATIONS:

Several of our goals had been met, the MCAA agreed that they (those present) would be happy to let us know what properties were rentals.

Several of our members said they had worked on keeping their immediate area's clean, and had initiated meetings with new members of their communities and shared newsletters or welcome letters.

One of the CONA members, Phil Worthington of Garden Hill created a NOISE CONTROL FLYER, it was made available for comment or ideas. After deciding on a few changes it was agreed by all to be ready for distribution. HAND and the MCAA both agreed to help distribute and print these brochures.

### INDIANA UNIVERSITY:

The City/I.U. bus integration has already started on a small scale. It is at the first step level and it is hoped that if it works out there will be expansion to the program. Time will tell.

Suzanne Phillips said she would do what she could to help with the printing and distribution of the Noise Flyer.

### CITY, HAND, POLICE DEPT. and SAFE AND CIVIL CITY:

HAND has an ongoing program to help develop Neighborhood Associations and is a constant source of information for CONA. They will be working on the enforcement of violations, we are all anxious to see how it works.

### MONROE COUNTY APARTMENT ASSOCIATION:

The MCAA has agreed as stated above to help distribute the Noise Flyer and other materials to their tenants but ask us to keep in mind that new tenants have a lot of materials to go through so in order to make it more useful perhaps we should try to keep it to a minimum.

They also thought that it might be possible to get information on their web-site and will look into that possibility.

It was mentioned by Susan Elkins Goldsworthy that perhaps a good place to get out certain information was at the utility companies. It was agreed to look into this form of distribution.
